- *Comments**
- Embroidery • Polyester threads are stronger and more colorfast than rayon threads. We do not recommend rayon thread.
 - Invisible Thread • Neutral colors and fabric-matched colors of Bottom Line and Kimono Silk also tend to become invisible.
 - Piecing • MasterPiece cotton thread is recommended for piecing, especially when high-heat pressing is needed.
• Polyester can also be used for piecing; however, be sure to use a low-med heat setting when pressing.
 - Serger • Polyarn and ProLock are 'woollie-like' threads for fleece and stretch fabrics.
